[WT 06-49. Ex parte presentation.](#)

Mr. D'Ari, Mr. Knapp:

[1. ITS America letter.](#)

Attached is a Letter from the Intelligent Transportation Society of America, dated today, and filed today on EFCS. (However, ECFS was not properly operating, and it may have to be filed again. The letter was also filed by email to the WTB Secretary today.)

This letter supports maintaining the current LMS-M rules with no change in order to protect and advance ITS in the nation. The letter discusses:

- LMS, as you know, is one of the two ITS radio services under Part 90, Subpart M;
- ITS is viable, expanding, and much needed in the nation (and worldwide);
- ITS-specific wireless, under developing technical standards, is essential to ITS;
- There is no substitute spectrum for wide-area ITS-specific wireless in the nation; and other relevant points.

Please distribute this this letter to those on your staff involved in this docket.

[2. Meetings request.](#)

I request an opportunity to make an in-person summary presentations to Bureau staff most involved in analysis and decision in this matter, and with OET staff most involved.

I would make arrangements to come to DC and make the presentation upon 4 days advance notice, but ideally, 7-10 days.

I may have one or more advisors attend along with me, or by telephone. However, I am fully familiar with my companies' position, and our underlying technical, economic, legal, and other reasons.

I have made past presentations in this docket, however, since then Progeny and other parties have made many presentations, some with new positions and materials. While I have submitted this year several responsive presentations by email and in filings on ESFC, my experience and advice of counsel is that in-person meetings are more effective.

Since I have met with you in the past on this matter (years ago with Mr. Knapp as OET staff, and more recently with Mr. D'Ari and Bureau staff) and understand that you are among those most involved, could you please respond to this request, or inform me who to submit the request to, if you are not the best persons.

I will call to discuss this request.

Thank you,

Warren Havens
President
